| **Team ID** | SWTID-2026-6686 |
| **Project Name** | Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer |
| **Maximum Marks** | 4 Marks |

### EMPATHY MAP CANVAS:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes. It is a useful tool to help teams better understand their users. Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

| THINK & FEEL | USER | SEE |
|---|---|---|
| • I need approval workflows to run automatically<br>• I worry about delayed hardware provisioning<br>• I want fast laptop delivery without complex administration<br>• I need confidence that every order is evaluated correctly | **IT PROCUREMENT MANAGER / END USER**<br><br>Role: Managing hardware requests & tracking orders<br><br>Goals & challenges: Automating requests, reducing bottlenecks, ensuring visibility | • Different departments and roles<br>• Catalog items containing Laptop specifications and pricing<br>• Flow Designer workflows and tasks<br>• Pending approvals and fulfillment statuses |
| **HEAR** | **USER** | **SAY & DO** |
| • Procurement requirements and budget policies<br>• Requests from employees and managers<br>• Status inquiries and audit feedback<br>• Feedback about delayed laptop deliveries | **SYSTEM / APPLICATION ADMIN**<br><br>Responsible for automating procurement flow<br><br>Goal: Allow workflows to route laptop requests automatically based on rules. | • Configure Flow Designer<br>• Write and test catalog items<br>• Check approval permissions<br>• Verify request stages and fulfill orders |
| **PAIN** | **USER** | **GAIN** |
| • Delayed procurement request visibility<br>• Manual approval bottlenecks<br>• Complex routing decisions<br>• Incorrect order allocations<br>• Frustrating tracking effort | **Key User Need Identified:**<br>The organization needs a dependable way to automate standard laptop orders using Flow Designer. The solution should route requests consistently, support automated approvals, and remain easy to test and maintain when procurement policies change. | • Automated workflow routing<br>• Reduced manual processing time<br>• Consistent procurement standards<br>• Easier testing and auditing<br>• Simpler maintenance and tracking |
