Data Flow Diagram

Date	15 March 2026
Team ID	SWTID-2026-6686
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	2 Marks

PROJECT TEAM STRUCTURE (TEAM SIZE: 4)
Team Leader: MANISHA R **Member 1:** GOPIKA K **Member 2:** VINDHIYA G **Member 3:** NITHIYASRI M

Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

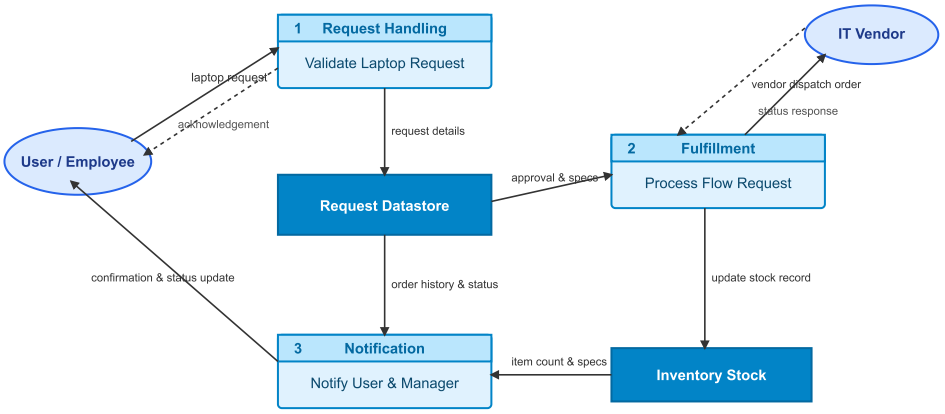

Symbol	Name	Description
Oval / Rounded shape	**External Entity**	A person, organization, or system outside the project that sends or receives data (e.g., Customer, Payment Gateway, Service Provider).
Rectangle with numbered header	**Process**	An activity that transforms incoming data into outgoing data (e.g., Validate Request, Process Order, Send Notification).
Rectangle (solid fill, no number)	**Data Store**	A place where data is held for later use (e.g., Customer Database, Inventory, Request Datastore).
Labeled arrow	**Data Flow**	The movement of data between entities, processes, and data stores, labeled with what data is being passed.

Example Data Flow Diagram

The diagram below illustrates how the symbols above come together to form a complete data flow diagram for the IT Procurement laptop ordering process.

Process Summary: The Data Flow Diagram illustrates how a standard laptop request initiated by an employee moves from initial validation into the ServiceNow Request Datastore, triggers automated approval workflows via Flow Designer, updates IT inventory records, communicates fulfillment requirements to hardware vendors, and dispatches automated status alerts back to the user.
