Project Proposal (Proposed Solution) report

The proposal report aims to transform IT procurement using automated workflow orchestration with ServiceNow Flow Designer, boosting efficiency and accuracy. It tackles manual bottlenecks and delays, promising better operations, reduced lead times, and happier employees. Key features include automated multi-level approvals, dynamic catalog tasks, stock validation, and real-time request tracking.

Project Overview	
Objective	The primary objective is to revolutionize the IT hardware procurement process by implementing ServiceNow Flow Designer workflows, ensuring faster fulfillment and accurate asset allocation.
Scope	The project comprehensively assesses and enhances the laptop order approval and fulfillment process, incorporating no-code/low-code workflow automation for a more robust and efficient system.
Problem Statement	
Description	Addressing delays and manual overhead in the current laptop request and approval process, which adversely affects employee onboarding velocity and operational efficiency.
Impact	Solving these issues will result in improved operational efficiency, reduced procurement lead times, and overall enhancement in employee onboarding and IT service satisfaction.
Proposed Solution	
Approach	Employing ServiceNow Flow Designer to automate multi-tiered approval chains, trigger dynamic fulfillment tasks, and notify stakeholders instantly.
Key Features	- Automated approval routing based on requestor tier and department budget. - Dynamic task generation for IT provisioning, image configuration, and dispatch. - Real-time decision-making and automated status updates for quicker deliveries. - Continuous workflow auditing to optimize IT asset lifecycle management.

Resource Requirements

Resource Type	Description	Specification/Allocation
Hardware		
Computing Resources	Workstation for development and workflow testing	Intel i7 / AMD Ryzen 7 CPU
Memory	RAM specifications	16 GB RAM
Storage	Disk space for platform configuration and documentation	512 GB NVMe SSD
Software		
Platform / Frameworks	IT Service Management & Workflow Engine	ServiceNow Platform (Vancouver / Washington DC Release)
Automation Tools	Workflow Automation & Integration	ServiceNow Flow Designer, Integration Hub
Development Environment	Instance & IDE	ServiceNow Developer Instance (PDI), Studio
Data		
Data / CMDB	Asset & User Data Source	ServiceNow Demo Data, Hardware Catalog Dataset, User & Manager Directory Data
