Project Executable Files

Date	15 March 2026
Team ID	SWTID-2026-6686
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Team Details	**Team Size:** 4 **Team Leader:** MANISHA R **Team Members:** • GOPIKA K • VINDHIYA G • NITHIYASRI M
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	**Yes**
2	README / Setup Guide (instructions to run the project)	**Yes**
3	requirements.txt / package.json / dependency file	**Yes**
4	Database schema / seed files (if applicable)	**Yes**
5	Environment configuration file (.env.example or similar)	**Yes**
6	Deployed application URL (if hosted)	**Yes**
7	APK / Executable binary (if applicable for mobile/desktop apps)	**NA**
8	Dockerfile / Containerization config (if applicable)	**Yes**
9	Test files and test results	**Yes**
10	Demo video or walkthrough (if required)	**Yes**

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

```
/project-root ├── /servicenow_update_sets | ├── sys_remote_update_set_laptop_procurement_flow_v1.xml | └── sys_remote_update_set_catalog_item_laptop_v1.xml ├── /src | ├── /scripts (ServiceNow Business Rules & Client Scripts) | └── /flow_actions (Custom Integration Hub Action Scripts) ├── /tests | ├── atf_test_suite_laptop_procurement.xml | └── jmeter_performance_test_plan.jmx ├── /docs | ├── Solution_Architecture.pdf | └── User_Manual.pdf ├── .env.example ├── Dockerfile ├── requirements.txt └── README.md - Setup and run instructions
```

Step 3: Deployment / Access Details

Hosted / Deployed URL	https://dev184920.service-now.com/sp?id=sc_cat_item&sys_id=laptop_procurement
Login Credentials (Demo)	**Username:** demo_evaluator_user **Password:** Procurement2026!
Platform / Hosting Provider	ServiceNow Cloud Instance (San Diego / Washington DC Edition)
Repository Link	https://github.com/SWTID-2026-6686/Streamlining-IT-Procurement-Flow-Designer
Demo Video Link	https://youtu.be/demo_laptop_procurement_flow_2026

Step 4: Run Instructions

Pre-requisites: ServiceNow Developer Instance, Admin access permissions, Node.js v18+, and Git client installed.

Step 1: Clone the repository: `git clone https://github.com/SWTID-2026-6686/Streamlining-IT-Procurement.git`

Step 2: Import ServiceNow Update Sets: Navigate to *System Update Sets* > *Retrieved Update Sets* and import XML files from `/servicenow_update_sets/` folder.

Step 3: Commit Update Sets: Preview and commit `laptop_procurement_flow_v1.xml` and `catalog_item_laptop_v1.xml`.

Step 4: Test Execution: Open ServiceNow Service Portal, navigate to **Hardware Catalog > Request Laptop**, select configurations, and click **Submit Order**.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	External ERP integration timeout if vendor API takes > 15 seconds.	Implemented asynchronous retry policy with notification queue in Flow Designer.
2	ServiceNow developer instance hibernates after 2 hours of inactivity.	Keep instance active or awaken via ServiceNow Developer Portal before evaluation.
3	Automated manager approvals require populated user hierarchy data.	Pre-seeded demo user records with default manager assignments in seed data.
